

Inspector D4000A

Bar Code Verifier
by MUNAZO INC.

Flexible & Cost Effective

The Inspector D4000 is the industry's most flexible and cost-effective ISO / ANSI bar code verifier.

This unit comes with your choice of a patented Auto-Optic scan head with four aperture sizes and two light wavelengths (eight different optical configurations) or an optional traditional laser scanner, for point-and-shoot simplicity.

Printed reports can also be generated, using the optional direct thermal printing unit.

Auto Optic:

Eight Optical Configurations

Features

- Dual Mode Portability: ISO / ANSI Mode Operation, or Traditional Operation (optional laser scanner required)
- Multiple Apertures and Light Wavelengths for Eight (8) Different Optical Configurations
- Traceable to the National Institute of Standards and Technology (NIST)
- Follows the ISO15416 and ANSI X3.182 Bar Code Inspection Methods (*auto-optic scan head only*)
- Conforms to ISO15426-1 Bar Code Verifier Specification (*auto-optic scan head only*)
- Auto-discriminates Between All Popular Symbologies
- Bi-directional Scanning AND Multiple Scan Averaging
- Option for Traditional Analysis and Reporting

This flexible and cost-effective unit is also easy to use, and supports all popular linear symbologies. The RJS D4000 offers store and print capability, multiple scan averaging, and sub-symbology choices—all easily accessible through a simple four-button user interface.

Bar code analysis information appears immediately on the 32-character alphanumeric liquid crystal display (LCD), and a distinct audible tone and a series of five colored LEDs indicate whether a bar code is in or out of specification. In addition to the ISO/ANSI method parameters, Traditional Analysis parameters are provided on the LCD, without a special mode setting.

Features

- ISO/ANSI Scan Profile Test Method
- Instant "On-Screen" ISO/ANSI Grade
- ISO/ANSI 10-scan Averaging
- Traditional Test Method
- Reflectometer Mode
- Auto-switch Symbologies
- Aperture/Wavelength selection via menu option
- Automatic Power Off
- Inspection Report Storage Buffer
- Detailed Hardcopy Printout (optional)

Verification Methods

Parameters determined by ISO/ANSI bar code print quality guidelines and traditional pass/fail criteria. Refer to model matrix below for configurations.
